

ABSTRACT
UNIVERSAL TOOL FOR SUPERVISING AND DRIVING AUTOMATONS

Sub
A8

The tool of the invention is entrusted with supervising and driving automats that are « smart », namely provided with means by which they can communicate with a microcomputer. This tool has a microcomputer (2), whose spreadsheet program (3) is connected through a driver (4), the operating system of the microcomputer and a connection line (6) to the automats. The driver emulates the proprietary language for controlling and supervising the automats.
